### AUTOBLANKING

Collegando la centralina all'ingresso retrocamera di un apparato multimediale, permette di visualizzare sul monitor la sola vignetta attiva oppure, se installata anche la retrocamera è possibile visualizzare sia l'immagine della retrocamera che la vignetta attiva.

When connecting the central-unit to the rear-camera-input of a Multimedia-device, the monitor will show only the active parking-symbol. On the other hand, when there is an installed rear-camera, you can visualize both: rear-camera-picture and active parking-symbol.

Brancher le boîtier à l'entrée caméra de recul d'un appareil multimédia permet de visualiser sur l'écran le symbole actif de stationnement, et avec une caméra de recul est installée, il permet de voir l'image soit de la caméra de recul que du symbole actif de stationnement.

Durch den Anschluss der Zentral-Einheit an den Rückfahrkamera-Eingang eines Multimediaal-Geräts, wird nur das aktive Park-Symbol auf dem Monitor sichtbar. Ist der Wagen mit einer Rückfahrkamera ausgestattet, lassen sich beide Situationen auf dem Monitor ansehen: Rückfahrkamera-Bild und aktives Park-Symbol.
